

Interfinish UK Ltd

ALPHA 100

Interfinish UK offer a wide range of relocatable partition systems for interior use. These systems have been installed in offices, hospitals, industrial & government buildings, schools and even airports from Dublin to Dubai and beyond.

*To choose **Interfinish UK** means to get utmost flexibility, timeless elegance, sustainability and endless possibilities of interior design.*

*All systems leave room for architectural creativity without bounds. **Whatever the budget, a solution can be created.***

ALPHA 100 The fast and easy design system that clicks together.

Like the Delta system the Alpha version shares a number of the features of the Omega system such as aluminium profiles with high quality finish, combined with a robust construction and high technical standards.

However, Alpha offers a different design based on clip-in techniques, that are synonymous for fast and easy installation.

Also for this system a wide range of solid and glazed solutions and a choice of matching doors in many attractive colours is offered. For usage as non-loadbearing partitions. Vertical connections by means of a special panel and a PVC click strip.

TECHNICAL SPECIFICATIONS
