

Interfinish UK Ltd

DELTA 100

Interfinish UK offer a wide range of relocatable partition systems for interior use. These systems have been installed in offices, hospitals, industrial & government buildings, schools and even airports from Dublin to Dubai and beyond.

*To choose **Interfinish UK** means to get utmost flexibility, timeless elegance, sustainability and endless possibilities of interior design.*

*All systems leave room for architectural creativity without bounds. **Whatever the budget, a solution can be created.***

DELTA 100 The modular system that does away with strong vertical connections, providing a smooth and elegant design.

Although this system is based upon the same set of profiles for its structure, it shows a neat recessed shadow line instead of the omega or cover strip.

Aluminium profiles with high quality finish, combined with a robust construction and high technical standards, offer a wide range of solid and glazed solutions and a choice of matching doors in many attractive colours.

For usage as non-loadbearing partitions. Vertical connections between solid panels by means of a H-shaped profile and an 8mm PVC cover trim.
